Make use of the most user-friendly software and choose your favourite route.

Set up your personal profile account and pick your challenge.

The route appears and you can start directly! So pedal away!

With VirtuReal Cycling, Praxtour brings the most beautiful and challenging routes at various locations in Europe to you, as if you're really there! VirtuReal Cycling software, combined with a Praxtour bike offers you the most realistic indoor cycling experience. Climb the toughest climbs and feel what the pros go through. Or take a downhill off the peaks of the Alps along dizzying precipices. You can also enjoy beautiful flat routes along beautiful rivers and sceneries.

The basis of the virtual cycling experience is the extremely user-friendly software, VirtuReal Cycling. Designed to show the route films in lifelike images and to simulate the toughest climbs as accurately as possible. The associated Praxtour models are therefore built to cope with that. The Praxtour Power Console, with computer and 24" touchscreen monitor is the vital link for the best performance.

VirtuReal Cycling features Active Resistance. Therefore, like in reality you feel the resistance being changed automatically with an incline or decline. By shifting gears you determine the gravity and your speed, just like on a real bike. With your pedaling speed you determine the playback speed of the route film. All important information is displayed during the ride.

Levels are adjustable, from realistic to almost no resistance. In short, whether you want to train extremely hard, to ride a nice recreational bike ride or perhaps to rehabilitate in a motivating way: Praxtour provides all abilities, as lifelike as possible, so we can proudly say: **The Closest to Reality.**

Results are stored in a personal scoreboard. Useful as reference material for example in TimeRiding.

Top-10. If you have completed your ride - and have been fast enough - your result is listed in the Top-10.

TimeRiding. This allows you to ride a time trial against previously stored results.

MultiRiding. Two to four Praxtours can be linked in a network, which can be used to ride races against others. Time and distance differences are shown.

App. Use the Praxtour App to login or to transfer your results to your phone or to Strava.

Test & Training. Determine your heart rate-, rpm- and wattagenumbers with the built-in Powertests and Trainingoptions.

Route Films. When purchasing a system. Praxtour provides a box with six route films. In addition, a wide range of boxes with alternate routes is available, both challenging and difficult mountain passes and picturesque recreational flat routes. For the current range of route films go to www.praxtour.eu.

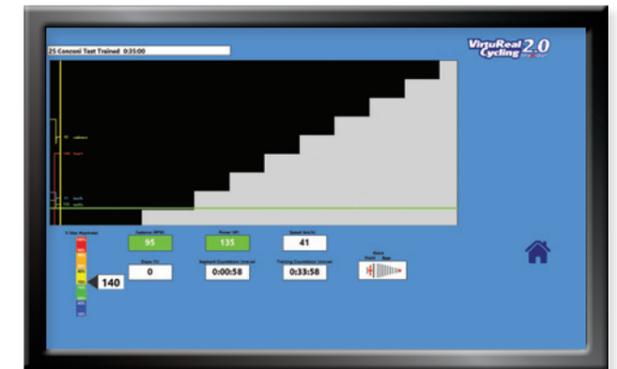

Free Updates of the program, often with new features can regularly be downloaded from the Praxtour website www.praxtour.eu. On Facebook we will keep you informed of new developments: [facebook.com/Praxtour](https://www.facebook.com/Praxtour)

All personal results will be stored.

Race against three other components to make it even more exciting.

Determine your heart rate and wattage and train like a professional.

Make use of one of these challenging routes.

Check www.praxtour.eu for more information about Praxtour, the newest route films and free updates.
