Praxtour 2 in 1
Cruise & Downhill
A realistic and fun cycling experience!

Combine the realistic cycling experience of the Praxtour Cruise with the Downhill game. This adds a very playful cycling experience. Take the cruise bike through the canyon, forest or snowy landscapes from the game. Use the red buttons on the handlebars to move the avatar within the game and try to collect as many coins as possible. But watch out for the obstacles! It goes without saying that it offers a realistic cycling experience. By cycling slower or faster, you decide how quickly the route film is played back. You also feel resistance when cycling (= active resistance). The low entry and comfortable bike saddle are convenient for all users.
